Illuminati Assembly Instructions

There are 11 separate pieces to your new Illuminati Lightbox (see "Illuminati Parts" photo):

- 4 slotted panels with vellum
- 4 wooden pegs to connect panels to base
- 1 base with 4 rubber feet, a circular LED light support, 10" long light strip connected to 5 volt USB LED controller
- 1 lid with knob
- 1 bluetooth controller (photo shows the remote controller)

Illuminati Parts

Panels are slotted to fit together, 2 with the slots on the bottom, 2 with the slots at the top. *Gently* slide panels together as shown with vellum on the inside. If they don't seem to fit in one configuration, switch panels around.

Panel assembly #1

Panel assembly #2

Panel assembly #3

Once the panels are fitted together, fit frame over base and insert wooden pegs through panel into hole in base on each side. Insert each peg halfway until all 4 are fitted in, then push all 4 in the rest of the way. They should fit snugly so if they don't seem to be going in properly, turn the base $\frac{1}{4}$ turn, fit frame over base, and try again!

Base assembly #1

Base assembly #2

Turn Illuminati upright and position the lid so the bottom piece nestles into

the top of the frame.

Lid fitting #1

Lid fitting #2

Connect your LED controller to the LED light strip piece via the male-to-male 4-pin connector that should already be plugged into the light strip. Carefully plug the pins back in if it came apart. An extra 4-pin connector has been included in the little bag that contains the 4 wooden pegs in case the connector is damaged in any way.

LED controller parts #2

Plug USB into a power source, then scan the QR code included in the LED bluetooth controller packet, or find the "Happy Lighting" app in the play store and download to your phone. Once it has downloaded, open the app and follow the directions in the enclosed Bluetooth instruction booklet. The 'Help' feature under settings in the app are even better!

Email us at support@centuryartisans.com if you have any questions.

Enjoy!
